DELIVERING FRESH. ALWAYS.™

• **BD3632IS** 45-3/8"L x 32-1/4"D x 82-5/8"H

BD3632IS

Included

- NOTE: ARM Form required at time of PO for this standalone unit w/ E-Box
- Breeze~E (Type-II) self-contained refrigeration
- (5) Display levels with (4) trays on each level
- Clear glass swinging door w/ left hinge (self-closing)
- Condensate pan
- Hydrocarbon refrigerant (R290)
- LED 4000K top & shelf lights
- One year parts & labor; 5 year compressor warranty
- Shelving removable and adjustable on 1" centers
- Warmest average product temperature of 40°F or less

Specify	Standard Features	Additional Options

Important Notes:

1) ARM Form required at time of PO for this standalone unit w/ E-Box.
2) Performance issues (product temperatures, water on floor, etc.) caused by adverse conditions are not covered by warranty.
3) Keep unit at least 15' from exterior doors, overhead HVAC vents, or any air curtain disruption.
4) End panels must be tightly joined or kept at least 6" away from any structure to prevent condensation.
5) Do not expose unit to direct sunlight or any heat source (ovens, fryers, etc.).
6) Tile floors, low ceilings, or small rooms will increase noise level.

⚠ **WARNING:** This product can expose you to chemicals, including Urethane (Ethyl Carbamate), which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

Placement of Case

Consider where the display case will be positioned relative to walls, ceilings, HVAC vents, windows, and other equipment discharging warm air.

The 5′ - 10′ - 15′ Rule

Stay 5′ away from an exterior window

Direct sunlight increases the heat load on the front of the display resulting in the refrigeration system having to work harder and possible condensation on the case.

Remain 10′ away from HVAC ceiling vents

Air blowing on the front of the display interrupts the air curtain and causes product temperatures to increase.

Minimum 4″ clearance to walls & ceilings.
Refer to spec sheets & design guide for further information.

With service display cases that have a glass front, air blowing on the front glass causes condensation to develop.

Position the display 15′ away from exterior doors

Air drafts from the front exterior doors interrupt the air curtain, allowing warm air to penetrate the inside of the display, affecting product temperature.
