

Autonomous Retail Is Smart, Efficient, And Profitable

Structural Concepts is the only refrigerated manufacturer to design and manufacture a **complete smart solution** for autonomous shopping.

Offsetting labor challenges, an appealing merchandising format with increased capacity, a cashier-less transactional system, and the ability to streamline inventory management, this single solution provides a quick payback turning into increased profitability.

Autonomous Retail Merchandising Explained

Frictionless Checkout

A location fitted with technology (merchandisers) that enables frictionless checkout for shoppers.

Simple

Shoppers simply enter the space; authorize their payment method, grab the items they want and leave.

Contactless

No need to checkout with a cashier, scan items, or use a special cart to track and pay for your items.

ARM Features

SCC offers a **fully secure** Autonomous Retail Merchandiser that is both **consumer & operator friendly**.

Provides **100% security**, 100% inventory control and management.

An **easier than industry** standard restocking process.

Simplified **flat fee structure**.

Requires a method of payment (credit/debit, student ID, work ID) that will be pre-authorized upon presentation to the POS device.

Easy integration with existing payment processing systems.

More merchandising capacity leading to **more sales and increased profitability**.

The Structural Concepts Autonomous Retail Merchandiser is an Ideal Solution for Foodservice Environments

38% of college students want dining options open 24/7.
McKinsey

Campus store/cafe **traffic increased 21%** and average **transactions grew 23%** in the months after going autonomous.

Chartwells Higher Education Path Forward Survey

22% (one-fourth) say that automation and technology is the biggest trend in healthcare dining right now, and 9% say they're using it to help them with their labor shortage issues. *FSD's 2022 Healthcare Survey*

Contactless options popularized by the pandemic will continue to be in-demand. *Lodging Foodservice Report*

These fresh food merchandisers use less energy and maximize space, leading to a faster return on investment.

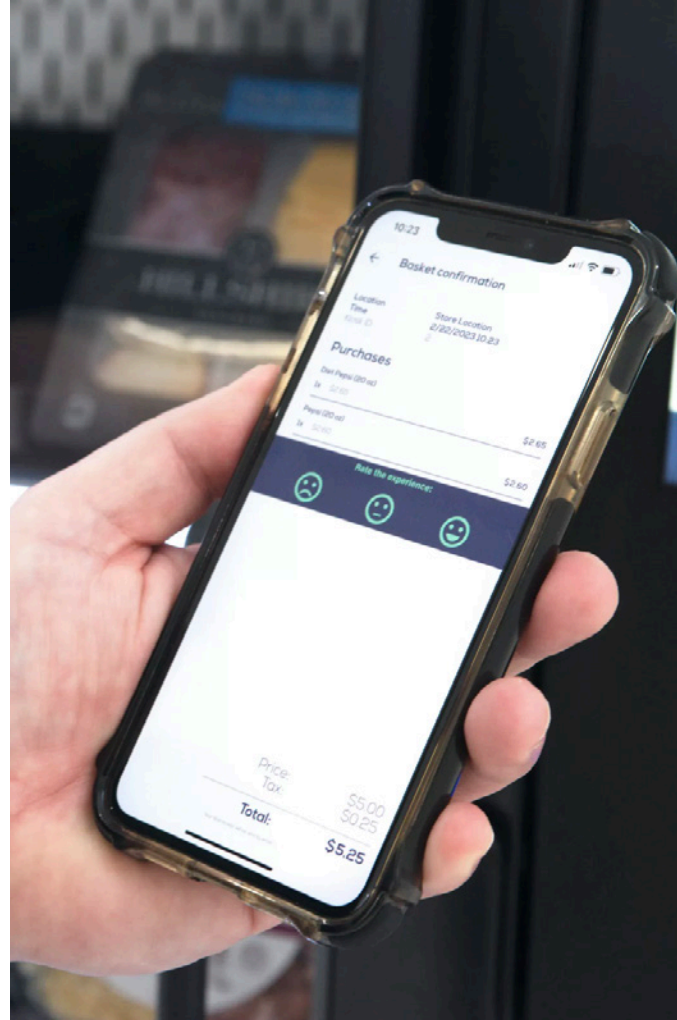

Using a proven technology partner to accurately manage inventory. This includes sales data analytics, inventory levels/restock management, inventory shelf life, and system connectivity and health.

A Simple Working Process

1. The consumer presents a payment method.
2. Once the payment method is authorized, the door unlocks, and the consumer is free to take the desired items off the various shelves.
3. When satisfied with their selections, the consumer closes the door, and the door instantly locks.
4. If the consumer is done shopping, they can either tap the "Pay" button on the tablet screen or just walk away.

Market circumstances may dictate the best experience for the consumer. For instance, a Healthcare or B&I environment may require a longer delay to finalize a "walk-away" than a College/University based on security or maturity of the customers. This and other parameters can be set up by the operator for each merchandiser.

A Closer Look at ARM

Security Camera

Directed down to only capture hand making selections; used only to settle disputes.

Load Cell Trays

Operator programs food in each tray via the App; weight tells systems what's been selected.

R290 Refrigeration System

Slide-out pan, variable speed compressor, and an on board condensate pan.

Interactive LED Shelf Lights

Identifies tray that product was selected from & turns red when wrong product is put in a tray.

Ordering Table Cart/Screen

67% of consumers highlight that contactless experiences are important because they're easy to use.

Credit Card Terminal

A majority of those who say that contactless experiences are important say it's because they're quick (59%).

An Enhanced Solution Leading to an Increase in Profitability

Holds 39% More Food

Expanded merchandising space for better product pack out.

Operates Seamlessly in Remote Locations

Electronic locking door & built-in camera provide high level of security and load cell technology in shelves assists with inventory. Built-in monitoring provides automatic notifications for remote management.

Complete Solution from a Single Manufacturer

Manufactured and shipped in the USA, ARM models uphold industry standard lead times and service after the sale support.

Includes SCC's Hallmark Industrial Design and Feature Sets

Design friendly footprint seamlessly integrates into all SCC existing spaces for easy transition.
