B3632H (HEATED)	36 1/2"				36 7/8"	

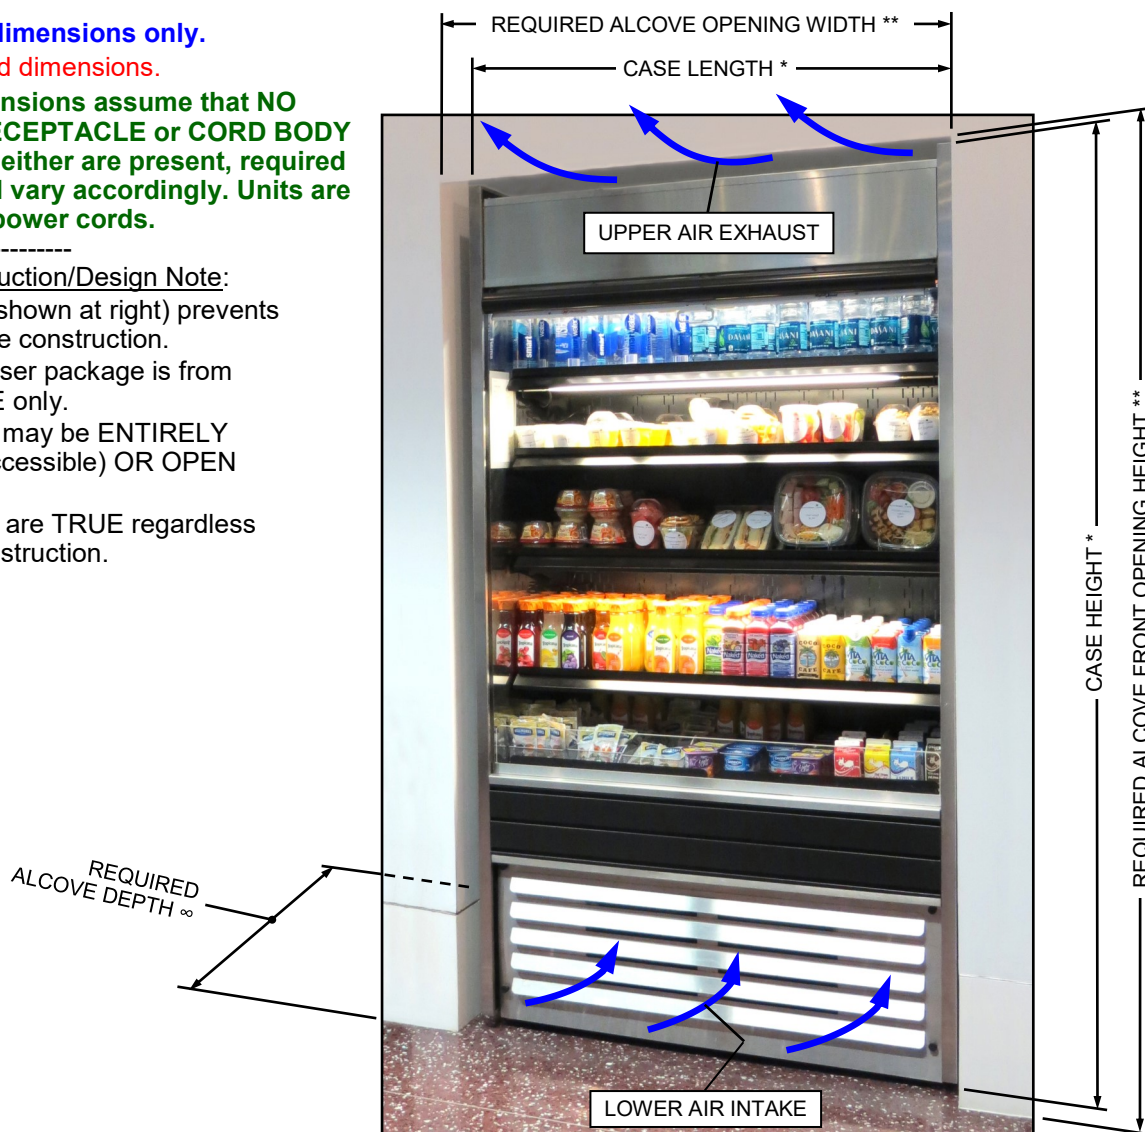

* Approximated dimensions only.

** Minimum required dimensions.

∞ **Important:** Dimensions assume that NO ELECTRICAL RECEPTACLE or CORD BODY is behind unit. If either are present, required alcove depth will vary accordingly. Units are shipped with 6' power cords.

Rear Alcove Construction/Design Note:

- Case illustration (shown at right) prevents view of rear alcove construction.
- Access to condenser package is from FRONT OF CASE only.
- Thus, rear alcove may be ENTIRELY ENCLOSED (inaccessible) OR OPEN (accessible).
- Dimensions listed are TRUE regardless of rear alcove construction.

SECTION D: ALCOVE AND WINDOW UNITS - ADJOINMENT GUIDELINES

IMPORTANT!

1. ADJOINED CASES WILL HAVE END PANELS REMOVED AT EACH POINT OF ADJOINMENT.
2. EACH END PANEL IS 1 5/16" WIDE.
3. **CAUTION! CHECK THAT FLOOR PLANS TAKE INTO ACCOUNT END PANEL REMOVAL (AS PART OF ADJOINMENT PROCESS) FOR DIMENSIONAL ACCURACY. OTHERWISE, ADJOINED UNITS WILL NOT BE PROPERLY DISPLAYED IN ALCOVES AND WINDOWS.**
4. YOU MUST FOLLOW VERY SPECIFIC GUIDELINES WHEN ADJOINING CASES. SEE NEXT PAGE FOR DETAILED INSTRUCTIONS.

MODELS B4732TM SHOWN ABOVE FOR TWO (2) ADJOINED UNITS.
NOTE: THERE ARE ONLY TWO (2) END PANELS USED IN ANY LINEUP
(REGARDLESS OF HOW MANY CASES ARE INCLUDED IN LINEUP).

1. Overview / Silicone and Butyl Application

Sealant Overview:

- Warranty is void if improper sealant is used.
- Sealing tub prevents air from escaping through seams between cases (causing condensation problems and reducing refrigeration efficiency).
- Sealing also prevents water from seeping between cases to the floor.

Silicone and Butyl Application:

- Form (1) INNER sanitation bead AND (1) refrigeration bead BEFORE case is adjoined (as shown).
- Then, AFTER case is adjoined (and bolted), form (1) OUTER sanitation bead (as shown) into any cavities or gaps that may remain along outer adjointment areas where butyl has ALREADY been applied.
- Also place a thick bead of caulk around drain.

2. Bolting Adjoined Units

- Bolt holes are at various locations (depending upon model). Model illustrated MAY NOT exactly reflect your particular unit but will likely be similar in layout.
- Use appropriately sized nuts and bolts for each hole.
- #1 hole is accessible at honeycomb (slight adjustment or removal of honeycomb air diffuser may be necessary for attachment of bolt).
- #2 hole is accessible near rear plenum.

- #3 holes are accessible after removing decking.
 - #4-6 holes are accessible after removing front panel.
 - #7-9 holes are accessible after removing rear panel.
- >> Be sure to reattach components to case after the adjointment process is complete.

Note: Any changes to this document must also be made to P/N 54110

Note: Model B4732 (Unit Shown) May Not Exactly Reflect Every Feature or Option of Your Particular Case.
