

7 Industries That Will Benefit from the Autonomous Retail Merchandiser

Stadiums & Arenas

Autonomous stores speed up concessions and enable fans to get the items they need and get back to their seats in record time.

30%

of fans believe being able to **stay in their seat** is the most important way to improve the food and beverage experience at an event, closely followed by **faster transaction times**.

59%

of fans would spend more on food & beverages if **wait times were shorter**.

Amusement Parks

A quick and seamless checkout process enables event goers to save time, and actually enjoy their time at a festival or amusement park.

10 minutes is the **maximum acceptable time** attendees will wait to purchase food and beverages.

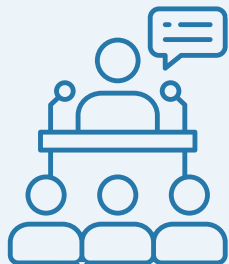

Grab and Go Locations

Autonomous stores have the potential to nearly double profit margins compared to traditional retail stores.

The worry about **retail shrink** is **mitigated** as the shopper data provides foodservice managers with **insights into customer behavior**.

Convention Centers & Meeting Venues

Locations hosting business networking conferences or cultural events can greatly benefit from implementing an autonomous store.

Attendees can **quickly grab the food and drink** they need for lunch and get back to their business endeavors or favorite exhibition.

Workplaces

In-office workplaces require quick access to snacks and beverages for a brief break in between meetings or projects.

An autonomous store placed within a shared office space, such as a lobby, allows businesses to cater to **busy workers** with limited time on their hands while **optimizing sales during rush hours**.

Travel Locations

Autonomous stores ensure travelers can quickly get the items they need and get back to their travel adventures in minutes—sometimes even seconds.

Most autonomous stores **operate unattended 24/7**, catering to shoppers at all hours of the day and ensuring products are always available to them, **even in remote locations**.

Colleges and Universities

Autonomous stores on campuses are effectively addressing the challenge of providing students with access to nutritious food and essential items at any hour of the day.

These efficient stores enhance the **fast-campus shopping experience** by operating with minimal staff and extended hours, resulting in **increased sales** during less busy periods.
