

Fresh Food Anytime, Anywhere for Corporate Employees

Generate More Sales and Profits with the Autonomous Retail Merchandiser

Structural Concepts is the only refrigerated manufacturer to design and manufacture a **complete smart solution** for autonomous shopping.

Offsetting labor challenges, an appealing refrigerated or ambient merchandising format with increased capacity, a cashier-less transactional system, and the ability to streamline inventory management, this single solution provides a quick payback turning into increased profitability.

A Fully Automated Experience for Consumers and Operators

Automated Checkout allows shoppers to browse products directly on the shelf, have their selections automatically added to the cart, and pay with credit/debit and mobile payment for faster transactions.

For the operator, the autonomous solution tracks inventory and requires less labor, resulting in increased productivity.

With cost-effectiveness a growing concern, some in-house food service providers and large office cafeterias are too expensive to maintain, especially when employees have embraced more flexible work models. An autonomous store placed within a shared office space, such as a lobby, allows businesses to cater to busy workers with limited time on their hands while optimizing sales during rush hours.

Less than **30%** of companies offer an on-site, formal cafeteria.

SHRM

To combat the increased complexity caused by the foodservice labor shortage, **72%** of sellers of fresh food are using, or planning to use, automation to decrease their team's time on hands-on work.

Foodservice Director

28% of employees would like their employer to provide healthy snacks at the workplace by offering convenient, healthy options to employees.

Food in the Workplace Survey Reveals Food Perks Influence Millennials

Creating spaces where employees can grab a quick bite and take a coffee break when they need to recharge is a growing trend on business campuses.

ARM Features

- Operates seamlessly in remote locations.
- Safe and secure cashier-less transactions.
- Holds 23% more product than other models; fewer and easier restocks.
- Simplest and lowest flat fee structures.
- Easy integration with existing payment systems.
- Accepts most methods of payment.
- Lowest overall operating costs.
- Includes SCC's hallmark industrial design and features.

The consumer presents a payment method.

Once the payment method is authorized, the door unlocks, and the consumer is free to take the desired items off the various shelves.

When satisfied with their selections, the consumer closes the door, and the door instantly locks.

If the consumer is done shopping, they can either tap the "pay" button on the tablet screen or just walk away.

If an item gets put back, it gets removed from the cart. If the item is put back in the wrong place, an alert is offered to the customer that the item has been placed in the incorrect spot and is still in their shopping cart until it is put back in the appropriate space.
