

**Structural Concepts®**

DELIVERING FRESH. ALWAYS.™

## Fresh Food Anytime, Anywhere for Patients, Visitors, and Healthcare Staff

Generate More Sales and Profits with the Autonomous Retail Merchandiser

Structural Concepts is the only refrigerated manufacturer to design and manufacture a **complete smart solution** for autonomous shopping.

Offsetting labor challenges, an appealing refrigerated or ambient merchandising format with increased capacity, a cashier-less transactional system, and the ability to streamline inventory management, this single solution provides a quick payback turning into increased profitability.

## A Fully Automated Experience for Consumers and Operators

Automated Checkout allows shoppers to browse products directly on the shelf, have their selections automatically added to the cart, and pay with credit/debit and mobile payment for faster transactions.

For the operator, the autonomous solution tracks inventory and requires less labor, resulting in increased productivity.

Autonomous stores offering 24/7 convenience can support many other healthcare foodservice operations including those of the staff during afterhours when formal dining facilities are not open.

71% of operators indicate that they are likely to invest in replacing equipment, and 68% said they are likely to invest in technology within the next 24 months.

*AHF State of the Industry Report*

22% (one-fourth) say that automation and technology is the biggest trend in healthcare dining right now, and 9% say they're using it to help them with their labor shortage issues.

*FSD's Healthcare Survey*

To combat the increased complexity caused by the foodservice labor shortage, 72% of sellers of fresh food are using, or planning to use, automation to decrease their team's time on hands-on work.

*Foodservice Director*

Just over one-third of employee meals are from on-site offerings. Most employee meals are brought from home, though nearly 20% of healthcare employees are getting their food from an off-site provider.

### ARM Features

- Operates seamlessly in remote locations.
- Safe and secure cashier-less transactions.
- Holds 23% more product than other models; fewer and easier restocks.
- Simplest and lowest flat fee structures.
- Easy integration with existing payment systems.
- Accepts most methods of payment.
- Lowest overall operating costs.
- Includes SCC's hallmark industrial design and features.

Utilize for floor stock items.

The consumer presents a payment method.

Once the payment method is authorized, the door unlocks, and the consumer is free to take the desired items off the various shelves.

When satisfied with their selections, the consumer closes the door, and the door instantly locks.

If the consumer is done shopping, they can either tap the "pay" button on the tablet screen or just walk away.

If an item gets put back, it gets removed from the cart. If the item is put back in the wrong place, an alert is offered to the customer that the item has been placed in the incorrect spot and is still in their shopping cart until it is put back in the appropriate space.
