

Structural Concepts®

DELIVERING FRESH. ALWAYS.™

Fresh Food Anytime, Anywhere for Travelers and Event Goers

Generate More Sales and Profits with the Autonomous Retail Merchandiser

Structural Concepts is the only refrigerated manufacturer to design and manufacture a **complete smart solution** for autonomous shopping.

Offsetting labor challenges, an appealing refrigerated or dry merchandising format with increased capacity, a cashier-less transactional system, and the ability to streamline inventory management, this single solution provides a quick payback turning into increased profitability.

A Fully Automated Experience for Consumers and Operators

Automated Checkout allows shoppers to browse products directly on the shelf, have their selections automatically added to the cart, and pay with credit/debit and mobile payment for faster transactions.

For the operator, the autonomous solution tracks inventory and requires less labor, resulting in increased productivity.

Autonomous stores ensure travelers can quickly get the items they need and get back to their travel adventures in minutes. Locations hosting business networking conferences or cultural events can greatly benefit from implementing an autonomous store as attendees can quickly grab the food and drink they need for lunch and get back to their business endeavors. Autonomous stores at sporting events speed up concessions and enable fans to get the items they need and get back to their seats in record time.

Contactless options in the hospitality segment popularized by the pandemic will continue to be in-demand for the foreseeable future.

Lodging Foodservice Report

59% of sports fans and concert goers would spend more on food & beverages if wait times were shorter.

AiFi, How Autonomous Store Solutions are Transforming Industries for the Better

Only **10 minutes** is the maximum acceptable time attendees will wait to purchase food and beverages.

AiFi, How Autonomous Store Solutions are Transforming Industries for the Better

Many airports do not have enough space to hold the necessary equipment for restaurant outlets, and they are struggling to get the best equipment, while supply chain issues and financial constraints are major concerns.

ARM Features

-  Operates seamlessly in remote locations.
-  Safe and secure cashier-less transactions.
-  Holds **23%** more product than other models; fewer and easier restocks.
-  Simplest and lowest flat fee structures.
-  Easy integration with existing payment systems.
-  Accepts most methods of payment.
-  Lowest overall operating costs.
-  Includes SCC's hallmark industrial design and features.

The consumer presents a payment method.

Once the payment method is authorized, the door unlocks, and the consumer is free to take the desired items off the various shelves.

When satisfied with their selections, the consumer closes the door, and the door instantly locks.

If the consumer is done shopping, they can either tap the "pay" button on the tablet screen or just walk away.

If an item gets put back, it gets removed from the cart. If the item is put back in the wrong place, an alert is offered to the customer that the item has been placed in the incorrect spot and is still in their shopping cart until it is put back in the appropriate space.
